

CYBERTRON FPV DRONE

One FPV Drone With Under and Overslung Modes

Introducing the Cybertron FPV Drone V2 - one FPV drone with two configurations: under-slung dual op FPV mode and top mounted dual op FPV mode. The Cybertron carries a full size payload (Camera, FIZ, Ultra Prime Lenses, HD RX/TX), through the tightest spots and rips at 100mph at 15,000 feet for a 7 minute flight time. Cybertron V2 allows for quick changeover from overslung to underslung in just minutes.
